Experience Summary:

Experienced REST API Developer: Over 10 years of technical expertise, with a focus on Java development for more than 7+ years. Proficient in the full software development life cycle, specializing in distributed enterprise applications and web-based solutions.

Methodology Proficiency: Skilled in Agile and Waterfall methodologies, ensuring effective project delivery and adaptation to varying project needs.

Technical Expertise: Strong analytical and programming skills, with deep knowledge of Java/J2EE, Spring Framework (including Spring Boot REST API, Spring Cloud, Spring DAO, Spring MVC, Spring Resources, Spring Data), and JPA

Cloud Platform Knowledge: Familiarity with Azure, PCF and Google Cloud (GCP), leveraging cloud technologies to enhance application scalability and performance.

Problem-Solving and Team Collaboration: Known for adept problem-solving abilities, quick learning, and effective collaboration as both an individual contributor and team player.

Communication Skills: Excellent communication and presentation skills, facilitating clear and concise interaction with stakeholders and team members.

Technical Skills:

Technologies:	J2EE, Java EE, Spring, Spring Boot Servlets, JSP, WSDL, XML, JDBC, MVC, Hibernate, Microservices, Java 8 (LTS), Java 11(LTS), Angular
Languages / API's	Java, SQL, UNIX, HTML, Java Scripts, CSS
Web / Enterprise IDE	Grails, Servlets, JSP, GSP, JDBC, XML, JPA, Spring, Spring boot, Spring Data Eclipse, RAD, GGTS, IntelliJ
Application Servers RDBMS	Web Sphere, JBoss, Tomcat, PCF, Azure ORACLE, DB2, MySQL, MS-SQL Server
Operating Systems Tools	Windows XP, 7/8/10/11, Linux Eclipse, WSAD, RAD, SVN, Junit, Spock, Ant, GGTS, Maven, Jenkins, IntelliJ, Bamboo

Education:

- B.S. from Bellevue University, Omaha, NE
- Advanced Diploma in IT Aquinas Sri Lanka
- Java Certification University of California San Diego
- Google Certifications (GCP)
- Microsoft Azure Certifications

Professional Experience:

Project name: Flight Hours Service (FHS) Airbus

Aerexchange Farmers Branch, TX

Jan 2024 – Aug 2024

Java J2EE Developer/Spring Boot Developer/Application Support

Aerexchange is the only electronic business network that supports all MRO business processes within the aviation industry for buyer and sellers. Aerexchange provides a complete lifecycle of electronic

communication from order creation to final invoice. The Aeroxchange service accelerates repair, replenishment, sourcing, inventory pooling and other critical operations in the aviation supply chain.

Responsibilities:

- Used **Spring data JPA access layer** to access and update information in the database.
- Development of **Data access API**
- Developed Dropdown model for incoming xml **messaging service IBM message**.
- Design and development of the **Spring boot REST API (Internal)**
- Refactored **Spring Security Authentication Module**.
- Built Entire Module covert **PDF to encrypt XML messaging**.
- Developed custom **PDF generation solutions using iText application** built on **JAVA 11**,
- Automated report **API generation and documentation (Swagger)** management processes.
- Provided application support on **application migration** and **L3 support** of applications
- Work with **REAL6 Unix servers**.

Environment:

Spring Boot, WebLogic, GSP, jQuery, JPA, Jira, SQL, Maven, Windows, RTC, Bitbucket, Postman, Jekin, Linux

Professional Experience:

Project name: Correspondence Examination Automation Support (CEAS)

Intellect Solutions Client: IRS Farmers Branch, TX (Short Term Contract No Sec clearance) Jun 2023 – Jan 2024

Java J2EE Developer/Spring Boot Developer

Detail-oriented IRS Audit Specialist with extensive experience in conducting thorough reviews and examinations of organizations' and individuals' financial information. Adept at ensuring compliance with tax laws and regulations while verifying the accuracy of reported tax amounts. Possess a strong analytical mindset and excellent communication skills to facilitate effective audit processes.

Responsibilities:

- Used Spring data access layer to access and update information in the **Oracle database**.
- Development of **Data Access API Layer Deployed to tomcat server Locally & to PCF cloud**.
- Developed report module **using Spring boot API** application built on **JAVA 8+** deployed to **PCF/AWS cloud**
- Design and development of the **Audit REST API (Internal)**
- Refactored **Spring Security Authentication Module Oath 2.0**.
- Built Entire **Module using Servlet 6.0**
- Developed view layer to isolate **CSS and JS (jQuery) Scripts from JSP Pages**.
- Implemented cloud-based solutions on **Microsoft Azure**.
- Automated deployment pipelines using **Azure DevOps**.
- Managed and monitored **Azure Cloud resources and services**.
- Built a document management system with **Spring Boot** and integrated it with **Azure Blob Storage**.
- Implemented role-based access control (RBAC) and secure file sharing
- **Development** of a Proof of Concept (PoC) **React application to validate key features** and functionality.
- **Designed and implemented** the component using **React hooks** and context API.
- **Integrated API services** for data fetching, ensuring efficient and secure using **Ajax** communication with the backend.

Environment:

Spring Boot, Azure, GSP, jQuery, JPA, Jira, SQL, Maven, Windows, RTC, Bitbucket, Postman, Jekin, Linux

Professional Experience:

Project name: Billing & CAT

Infosys Client: Charles Schwab Westlake, TX

Java J2EE Developer/Spring Boot Developer

Jan 2018 – June 2023

The project involves application enhancements & modernization, application integration to support the functionality and performance improvements to ensure the highest level of system availability to the Billing solution platform. TBMS platform is an online web Billing platform that is available for retail investors and Fund managers for billing financial statements like Invoice, monthly statement, and mutual fund account Invoices, fixed income, fixed-income security.

Responsibilities:

- Development and Designed of the **microservice services with Java API and Spring boot 2.7.**
- Maintained the **Microservices Centre Platform.**
- Implement **PCF ASG & Created Deployment Space in PCF Cloud.**
- Design and development features in (using **WebSecurityConfigurerAdapter**) Microservices ex: login screen | email options.
- Refactored **Spring Security Authentication.**
- Built a new **plugin module-based jar application.**
- All functionality Implemented **Spring boot and spring data (JPA) spring** Transactional and spring security Modules.
- Build **Spring Boot MVC modules with thyme-leaf.**
- Refactored/Converted java methods to **new functional programming (Stream API).**
- Refactored existing legacy services to microservices.
- Implemented **Bamboo pipeline and SonarQube for CI/CD environment.**
- Implemented **Veracode scan & fixed security flows.**
- TDD development using **Junit.**
- Worked with tools like **Git/Bitbucket/Jenkins/Artifactory/Nexus /Bamboo** migration, deployments & development.
- **Implemented OAuth2 for secure REST API communication.**

Environment:

Java, Spring Boot, jQuery, JPA, PCF cloud, Microsoft SQL, Maven, Windows, JIRA, Git, Postman,

Professional Experience:

Project name: On Your Side Writers-Tool

Jan 2017 – Dec 2017

Fast Switch Client: Nationwide Insurance, Columbus, OH (Contract)

J2EE Developer/Spring Boot Developer

Nationwide is among top 10 insurance companies in the United States which markets and services its insurance and financial its products in all 50 States. 'On Your side Writers-tool' project involved in developing the web application which is used by Business Analysts (BAs) to generate reports. Website serves for are 3 different types of roles; user, writer and Admin. This application was originally developed with Groovy/Grails 2.1.1 and since has been upgraded to Spring boot application.

Responsibilities:

- Developed the entire **spring boot MVC the application using HTML, CSS and Bootstrap, jQuery** (Not thymeleaf)
- Developed **entire REST API to produce report module.**
- Design and **development of the REST API (Internal)**
- Build the unit test with **Spock framework (Spock test) to validate the release of the built components using Clover code coverage.**
- Built a new module to **convert WAR file into EAR file using Gradle.**
- Refactored the view layer to **isolate CSS and JS (jQuery) Scripts from GSP Pages.**
- Resolved **incompatibilities during the upgrade from Grails 2 to Spring Boot 1.2**
- Refactored existing **API Controllers and Domains making them scalable and extensible.**
- Developed and **configured the entire Jenkins pipeline of the application.**

Environment:

Groovy, Grails, GSP, jQuery, JPA, WebSphere Application Server, SQL, Spock, Maven, Windows, RTC, SVN, Git, Postman, Bamboo, SpringBoot.

Professional Experience:

Project name: Life-Search

June 2014– December 2016

Bass LLC Client: Mutual of Omaha, Omaha, NE(Contract)

Java J2EE Developer

Mutual of Omaha is an insurance company which markets its products all over the United State. This project involved the development of web application to allow Life/Health Test bed testing system is used for testing of pre-issuing processing phase of insurance policies. The system designed was able a system to handle massive amounts of past insurance data to store, analyse, convert, and process several years of insurance data and also be able to simulate end-to-end pre-issuing processing phase of insurance policies.

Responsibilities:

- Developed **GSP and views for the web application.**
- Developed **validation and exceptions to handle the business logic.**
- Developed the front-end using **HTML, CSS and Bootstrap**
- Performed **JUnit** Testing of the application.
- Design and development of the **REST web services**
- **Developed CI/CD Bamboo Pipeline using Bamboo/Jenkins.**
- Integrated **RESTful APIs** to fetch and display **JSON dynamic data**, ensuring real-time updates.

Environment:

Groovy, Grails, GSP, JavaScript, SVN, Tomcat Application Server, SQL, Spock, Maven, Windows, Jenkins, Jira

Project name: Message-Centre

June 2013 – May 2014

Unifiedsys Client: Chegg, Omaha, NE (Contract)

Junior Java J2EE Developer

The Message-Center is a REST web-services web application, which is the Gateway for all outgoing communication messages (Email and SMS). This application is developed with Java/J2EE/Spring3/JaxWS. The Client interface is Javax based REST Web Service. This application is integrated with third party messaging service providers.

Responsibilities:

- Participated in various component (**POJO class**) development of the **REST API web services with Java 8 API** and Spring Gateway.
- Maintain and **debug the existing code and fix the issues.**
- Experience with **code debug, troubleshoot** and **performed root cause analysis** and provided technical solutions to production related application errors using **Splunk**
- Write **JUnit** **texting.**

Environment:

Java, J2EE, JSP, JavaScript, Spring3, JDBC, Tomcat Application Server, Oracle, SQL, JUnit, Gradle, Linux/Unix, Windows, Jenkins

Project-Name: Safety and Risk Management

Jan 2012 - May 2013

Client: UnifiedSys Koll's Pharmacy (In house project) Omaha, NE

Junior Java Associate/Trainee

Safety and Risk Management (SRM) is a comprehensive Web-based event reporting, tracking, monitoring and workflow management solution. SRM generates information that stakeholders across healthcare organizations can use to make the clinical, operational and financial decisions that improve patient care and reduce risk.

Responsibilities:

- Communicate with **product owners and implement the requirements.**
- Developed tools used in production environment, which reduce considerable amount of time for **debugging production issues.**
- Achieved performance **improvements in the data submission application.**
- Developed the **front-end using HTML, CSS, and Bootstrap.**
- Maintained **existing code, performed bug fixing, and development work**
- Participate code reviews using **Crucible and Fisheye.**

Environment:

JDK, Oracle, Eclipse, WebLogic, XML, XSL, Java Web services, SOAP, RestAPIs, EJB, JSP, AJAX, JQUERY, SVN, Windows NT/XP, Agile
